

DNCScrub Output

Below describes DNCScrub version 5 output. This is the output currently for the detailed.txt file and the output returned via our API when the version=5 parameter is passed. When analyzing your detailed.txt output file data please refer to these header rows and their descriptions reading from left to right.

Example Output: 9373106071,D,,National (USA) 2018-08-16;;;W,OH,US,Bellbrook,516C;IPES;"SBC Internet Services Inc:AT&T Internet Services" ,,35,,,-240,,,,1,VoIP

Field	Field #	Description	Example
Phone Number	1	10 digits without any dashes or spaces	9373106071
ResultCode	2	A single-letter which signifies the status of the Phone Number: B - Blocked. Number is in an area code not covered by the National Subscription on this project or is in a configured no-call area code, or no exemption was available in a pre-recorded call campaign. C - Clean number D - Do not call database match. Reason field provides additional details. Litigator numbers will reflect a D Result code and have Litigator in the Reason field E - EBR - currently valid, not on a Do Not Call list - number can be called F - Valid EBR and Wireless number in a US state that does not allow telephone solicitation to wireless numbers, even if manually dialed (States: WY, NJ, TX, LA, and AZ) G = Valid EBR and US Wireless Number or VoIP Number, not on any DNC database (<i>version 2+</i>) – still cannot be called from a predictive dialer as EBRs do not constitute an exemption to those rules. H - Wireless Number or VoIP Number that is also a Valid EBR - overriding an otherwise DNC number I - Invalid. Area code not active, or reserved, or special use phone number pattern (i.e. 555-5555) L - Wireless number in a US state that does not allow telephone solicitation to wireless numbers even if manually dialed (States: WY, NJ, TX, LA, and AZ) M - Malformed. Number is not 10 numerical digits.	Y

		O - EBR Override was applied to an otherwise Do Not Call number (including an explicit EBR overriding a number in Project DNC) - number can be called P - Internal DNC (also called Project DNC) database match. No further checks are performed once a number is found as Internal DNC. V - Valid EBR overriding otherwise DNC number that is also a Wireless number in a US state that does not allow telephone solicitation to wireless numbers, even if manually dialed (States: WY, NJ, TX, LA, and AZ) W - Wireless number – number is not in any DNC database X - Industry Exemption applied to an otherwise Do Not Call number Y - VoIP number not in any DNC databases (or it has been Overridden by an industry exemption). Note VoIP scrubbing must be purchased for this output to be returned	
Reserved	3	Field reserved for future user. Will be blank for now	
Reason	4	Provides information about which databases contain this phone number. If the phone number is Litigator, Litigator will be in this field If the phone numbers is VoIP and not on any DNC database, VoIP will be in the field. If the phone number is not Litigator or VoIP-only, the field will contain four subfields delimited by a semicolon: - The first subfield contains any National DNC details. If the record is not in the National DNC this field will be blank; otherwise it will contain National (Country) YYYY-MM-DD - The second subfield contains any State DNC details. If the record is not in a State DNC Db this field is blank; otherwise it will contain State (Abbrev) YYYY-MM-DD - The third subfield contains any TPS DNC details. If the record is on the Direct Marketing Association's list this field will contain "TPS (DMA)". If this record is on the Canadian Marketing Association's list it will contain "TPS (CMA)". No date is provided in this subfield. If the number is not on either one of these lists, this field will be blank. - The fourth subfield is an indication if Wireless or VoIP. The field contains W if Wireless or VoIP and the respective Wireless and VoIP databases are enabled.	National (USA) 2018-08-16;;;W
RegionAbbrev	5	The 2-letter postal abbreviation of the US state, US territory, or Canadian province corresponding to this phone number.	OH
Country	6	The 2-letter ISO 3166-1 code for the country corresponding to the number's area code.	US
Locale	7	The geographic region (usually the city) served by the rate center associated with the area code and prefix of the phone number	Bellbrook

CarrierInfo	8	Comprised of three fields separated by semicolons describing the carrier responsible for the area code and prefix of the phone number. The first field is a four-character state or regional Operating Company Number (OCN) also known as a NECA Company Code. The second field is the type of carrier or service provider. The third field is the company name of the carrier or service provider for this phone number.	547D;CLEC;"Time Warner Cable Information Services (Ohio) LLC,tw telecom"
NewReassignedAreaCode	9	The new 3-digit area code that should be used in place of the area code of the phone number as it has been reassigned in the process of an area code split. If this field is blank, no change to the area code is needed.	
tzCode	10	A 1 to 3-digit numeric code referencing a lookup table of Time Zone UTC (GMT) Offset and Daylight Savings Times (DST) observance. See last for additional information.	35
CallingWindow	11	Lists the calling window for telemarketing calls as applicable to this phone number based on federal and state laws.	8:00-21:00;8:00-21:00;8:00-21:00
UTCOffset	12	A signed integer of the number of minutes to add to current UTC (GMT) time to obtain the current time at the phone number's location	-240
DoNotCallToday	13	Normally blank, except it will contain a 1 on days where the state for the phone number has a holiday or a state of emergency declaration (in either case, this number must not be called).	0
CallingTime Restrictions	14	Indicates if there are any calling time restrictions at the time of the scrub for the phone number. This field as a bitfield which returns these possible values: 0 = In State Window, no Exemptions, State has window – can call 1 = Out of State Window, no Exemptions, State has window –cannot call (i.e. not callable now) 2 = In Federal Window, Exemption Available, State's window overridden – can call 3 = Out of Federal Window, Exemption Available, State's window overridden – cannot call (i.e. not callable now) 4 = In Federal Window, State does not specify window or you are exempt – can call 5 = Out of Federal Window, State does not specify Window or you are exempt – cannot call (i.e. not callable now) 6 = Impossible Combination 7 = Impossible Combination	0

EBRType	15	Contains the type of EBR if the record has a valid Will be I for Inquiry EBR, S for Sale EBR, or P for Permission EBR. Blank if the record is not an EBR.	
IsWirelessOrVoIP	16	1 = the phone numbers is wireless or VoIP and both Wireless and VoIP scrubbing are enabled in scrub options. 0 otherwise.	1
LineType	17	Will contain Wireless, VoIP, WirelessInNoWirelessState, or AllOther. Note: for Wireless, VoIP, or WirelessInNoWirelessState to show as the line type, Wireless and VoIP scrubbing must have been purchased and enabled.	VoIP

Additional detail can be found in the DNC Compliance Network™ Enterprise Edition API Documentation, Version 2.13. We would be happy to supply this if needed. See next page for Time Zone information.
